INITIAL DRAFT

## 1. Introduction

Version r23 of the aseXML schema has been developed from r22. This schema release is presented to aseXML Subscribers and Industry Participants for review and to NEMMCO for approval, in accordance with the ASWG Terms of Reference.

This Change Proposal changes the definition for one complex data type and consequently removes a redundant simple data type for the High Speed Monitoring system.

## 2. Change Requests

The following ASWG Change Requests have been included in this schema release:

CR#	Description
36	Modify data type HSMComtradeText Delete redundant data type HSMComtradeTextFile

These Change Requests are available from the ASWG or the aseXML website ([www.aseXML.com](http://www.aseXML.com)) for review by all impacted parties.

### 3. Impact Summary

This table identifies the files, transactions and versioned types that are potentially impacted as the result of these changes, where:

- Modified types - is a full list of types changed by this Change Request
- Derived types – is a list of any types that are derived from a modified type, and are therefore also modified by default
- Versioned types affected – is a list of all versioned types that will need to have the version attribute updated as a result of this Change Request
- Transactions potentially affected – is a list of all transactions that contain a modified type, either directly or via a type substitution
- Schema files affected – is a list of schema files that will be changed in some way as a result of this Change Request.

## 6. ASWG Endorsement

The ASWG votes for endorsement of the schema, with the included aseXML Change Requests, and the voting results are forwarded to NEMMCO for approval. When 75% of those ASWG members who voted endorse a schema, this represents an ASWG Recommendation for that schema. NEMMCO will not reject an ASWG Recommendation without first consulting with the ASWG.

The results of the ASWG vote for the final schema to be released are as follows:

**Date of Vote: 29/03/2008**

Option	# Votes	% Vote
For	5	71.5
Against	0	0
Abstained	2	28.5
Total Members Present	5	71.5

\*Note Chairperson doesn't vote unless it a split vote.

## 7. NEMMCO Approval

The schema approval and approval date are identified below

Status	Date	Authorised by
<b>Approved</b> – The schema has been approved by NEMMCO and is formally released for use
